Rio de Janeiro: 14 August 2024: New information about energy, currencies, military technology, "Artificial Intelligence", peaceful options

VIENNA, VIENNA, AUSTRIA, August 15, 2024 /EINPresswire.com

(<https://www.einpresswire.com/>)/ -- On 14 August 2024 a Special Lecture

(<https://www.inst.at/at/special-lectures-2023-2024/>) took place at Rio de Janeiro via ZOOM. Host and Moderator was Univ.Prof.in Dr.in Beatriz Bissio. She introduced Sc.Dir.Dr. Herbert Arlt (Vienna), the Scientific Director of INST (a scientific network with about 10.000 participants from over 120 countries). The idea was to find with the Special Lectures a new format to distribute scientific knowledge. Fixed are the following Special Lectures by now for the rest of the year: Cairo (30.8.), Tokyo (11.9.), Paris (16.10.), Vienna (14.11.), Johannesburg (3.12.), Vienna (8.12.2024). Always combined with a documentation (TRANS 28, INST Channel) and information via news agencies.

What is needed today is a new peace architecture for the world. There are possibilities for ending the war in Gaza. The war in Ukraine will not end with peace talks because of Ukraine soldiers at Russian territory. Warriors with little own potentials like Netanyahu

This was the main thesis of (1) the Special Lecture in Rio de Janeiro on 14 August 2024: the world needs a new peace order. And this new peace order can only come with a new UN.” — Herbert Arlt

The facts everyone can take from the media of this world are the same. The interpretation is very different. On the one hand are the stories on the other hand the scientific approaches. With the Special Lectures results of research will be presented. And there will be not only a look at the actors. Most important are the backgrounds, the real forces, the economic processes.

One theory in the 1940ies was, that the First and the Second World War were military fights about

currencies. So a new world currency was suggested: the Bancor. The reality was that the British pound was replaced by the US dollar. The word petrodollar showed where the strength of the new world currency came from, an importance which is now coming to an end because of new realities (trade, values).

Important is in this context that 2025 will be the UN Year of Quantum technology (<https://www.arltherbert.at/installation-barcelona-2024-2/>). The Quantum installation in Barcelona showed the new possibilities which could come up with this new energy. The most important point: this misuse of Quantum technology for military purposes must be excluded. And this needs a new UN which will work together in the frame of a new peace order.

This means also a change of the cultural approaches. Just now UNESCO is weakened, because member states do not pay their tribute. But the time has come to make an end to the approaches of the 19th century, when cultures were abused for military propaganda in the time of a new warfare. You can take powder for joy or for killing people. These are different ways of cultural approaches.

The Bidenomics show that President Biden understood the necessity of a peaceful way to a multipolar world. But his suggestions at the G20 Summit in New Delhi cannot be realized because of the warrior Netanyahu. The war of Netanyahu blocks not only an alternative to militarized markets, Netanyahu blocs also the possibilities of US that the Dollar will play an important role in the future.

President Biden nearly finalized the alliance for the Dollar when the attack of Hamas came. President Biden understood that a peaceful way is necessary because the "military revolution" is over. The fights in Ukraine, Gaza, Africa show burning tanks, damaged Patriots. A technology today good for a surprise but not to win wars. And there is no chance to win peace in this way.

But it is not only a question of military technology. The stock exchanges show that the marketing term "Artificial intelligence" does not prevail because the technology cannot do what is promised by marketing. A reproduction of big data will not bring innovation. It is reproduction and that will not be changed by "training". With marketing billions of Dollars were activated. But the result will bring more damage than the digitisation of the financial markets by marketing. The financial crises costed the world about 2 trillion Dollars. And after oil, gasoline this new technology should be the backbone of Dollar. But the technology failed. This is evident for everyone who looks at the markets.

Since the financial crisis the role of G20 changed. G20 was thought that the world should pay for speculation in US and other parts of the world. When we look at the G20 summits in Indonesia (2022), India (2023) and the preparation of the G20 summit in Brasil (<https://www.g20.org/en/about-the-g20/summit-rio-2024>), we see that a new UN shall be

the solution of key problems of the world.

This was the main thesis of the Special Lecture at the Universidade de Janeiro on 14 August 2024: the world needs a new peace order. And this new peace order can only come with a new UN. The UN Future Conference on 22./23. September 2024 can only be a step in this direction. The background of this thesis is a cooperation of more than 10.000 scientists, artists, teachers, politicians since 14 November 1994. There will be with the Special Lectures also presentation of this polylogue on research results: Homepage, electronic journal TRANS, books, installations, INST Channel etc. And the UN year 2025 about Quantum technology shows that important projects are on the way that can change the world.
